Felo Ergonic VDE screwdrivers – The blades are insulated and are certified to IEC60900 standards, they are individually tested to 10,000v and guarantee safe working to 1000v. With conventional ergonomic screwdriver handles, it is always the hand that must adapt to the handle. Felo Ergonic screwdrivers feature a 3-component ergonomic handle that has flexible cushions that adapt to the user’s hand, this is exclusive to Felo. The perfect shape and integrated cushions provide optimum torque transmission and reduces strain on the hand and joints. The blades are manufactured from Chrome Vanadium Steel and have an induction hardened “Black Tip” for durability and a precision fit. Made in Germany and come with a 15-year guarantee.
