Data Sheets

Halder has engineered the FERROPLEX as a 2-in-1 combi hammer for all those who want to enjoy both the benefits of a steel hammer and the advantages of a soft-face mallet. The hammer head is made of premium heat-treated steel and carefully induction hardened on the impact surface. The replaceable nylon insert on the opposite side offers outstanding impact qualities and is guaranteed to combine maximum strength with unique durability. It is composed of extruded and extremely homogeneous material. Compared to injection moulded plastic inserts, it is therefore considerably more wear-resistant and durable and will never chip even in sub-zero temperatures. The break-proof steel tube handle is encased with an ergonomic non-slip rubber grip. The FERROPLEX is available in sizes of D30mm with a total weight of 600g and D35mm with a total weight of 800g.
